

Warehouse Management Systems

Visit www.kasten-storage.com/Products/Storage-Machines-and-WMS/WMS-and-Control-Software/ for the latest information.

Storage machines, automates, are computer-controlled storage and transfer systems that significantly improve the efficiency of product storage and picking. They are easy to integrate with the company's WMS or can be used as standalone systems.

An automatic storage system saves up to 70% on floor space, reduces picking errors and decreases picking time by more than 60%. The most efficient way of using storage machine is to have warehouse management included with the machine. TCPlus is suitable for use with a variety of storage systems such as storage machines, small-parts shelving and pallet racking.

WMS and Control Software is a product in the category

Storage Machines and WMS

Lift Systems (TORNADO)
PaC-Light
Vertical Carousell (PATERNOSTER)
Horizontal Carousell (HOCA)

Description

Storage Machines and WMS > WMS and Control Software

The versatile Kasten TCPlus- warehouse management system can be used to focus on managing storage locations and make the warehouse processes more effective. TCPlus provides a wide range of control for the entire warehouse.

TCPlus warehouse management program is flexible and very easy to use. Creation of a warehouse is simple and expeditious. It can be used to control all basic warehouse functions such as shelving, order picking, inventory, internal transfers, and check the contents of the storage location and prevent the use of a specific storage location.

TCPlus warehouse management system can be used in a wide range of different storage areas and warehouses, as well as a buffer, transit and cross-docking storage areas, and storage machines. TCPlus system clarifies the maintenance of inventory, improves efficiency and reduces errors. The picking from shelving and racking will be done with handheld devices.

Features

Kasten TCPlus warehouse management system is designed for the Windows environment. It offers ease of use, user-friendliness and flexibility.

- Multiple orders tracking tools
- Versatile warehouse tracking and administration tools
- Easy handling of items identified with tags throughout the storage process
- Label printing functions to help processes
- Internal item level tagging: picking labels, storage location labels, delivery address labels
