

Mobile Tyre Storage

Visit www.kasten.fi/en/Special-Solutions/Tyre-Storage-Solutions/Mobile-Tyre-Storage/ for the latest information.

Optimal storage of tyres is about maximising the space available without harming the quality of the tyre and also making it easy to handle the tyres.

We can tailor any solutions for you, from plain shelving systems to large warehouse solutions. A solution for your tyres should be flexible and tailored to your premises to maximise the space available.

Description

Tyre Storage Solutions > Mobile Tyre Storage

Both S90 Shelving System and P90 Pallet Racking System can be put on mobile bases. Mobile tyre racks significantly increase the storage space compared to traditional methods and is ideal when floor space is limited or rates per m2 are high.

- Electronic or manual drive systems
- Compact storage
- Fast access
- Scalable up to very large installations

Mobile S90 Shelving System

The mobile S90 shelving system can be mounted on existing floors making it an easy and cost efficient option.

Both manual or electrical drive systems can be selected. The electrical version makes it even easier to access your tyres and has the possibility of limiting access by requiring a code to open the aisle.

Mobile P90 Racking System (MOVO)

The MOVO system is ideal wherever a large amount of tyres need to be stored, such as in workshops that handle the exchange of winter and summer tyres.

The electronically controlled MOVO heavy-duty mobile racking system runs on embedded rails and can carry bay loads of up to 24 tons at racking heights of up to 12 metres.

Variable control options ensure ease of use and when the individual aisles are open, state-of-the-art sensor technology guarantees absolute safety.
