

Project Management

With the experience in project management and installation, Constructor Finland Oy is able to deliver everything from a single product to a turnkey solution to its customers. In all cases we

- Perform all work in accordance with agreed methods, instructions and specifications
- Work in partnership with other contractors to deliver the best solution
- Are flexible to accommodate changes to requirements

Safety is an essential part of the delivery and installation of our products. Effort is taken to ensure safe working practice in all stages of the project fulfillment. This is in line with industry's best practice and understanding of local health and safety legislation. In addition our broad geographical presence helps us to ensure, that we can follow local requirements and regulations in our product installation. Our project management professionals ensure we deliver and exceed expectations every time.
